Sajilo Yatra

Tester Guide: what to test, how to test it, and how to verify the result, for each role

Who this is for	A tester checking the website by hand. You do not need to read code.
Roles covered	Admin, Driver and Passenger
Time needed	About one working day for everything. About 2 hours for Sections 3 and 8 only.
Tester name	
Date tested	
Website address tested	
Build or version	

> **Golden rule: test only on the test website, never on the live one.** These tests create fake bookings, cancel trips and change settings. If you are not sure which website you are on, stop and ask the developer.

1. Before you start

What the system does

Passengers book seats on buses and vans without creating an account, and pay by scanning the driver's QR code. The passenger uploads a screenshot of the payment. The driver checks their bank or wallet, then approves or rejects it. The admin creates drivers and watches over everything.

Role	How they enter	Main job
Passenger	Just opens the website. No login.	Searches, picks seats, pays, tracks the booking and gets a ticket.
Driver	Signs in. The admin creates the account.	Manages their own vehicles, routes and payment QR. Publishes trips, checks payments and runs each trip.
Admin	Signs in.	Creates drivers, monitors everything, settles refunds, and manages website text and settings.

Ask the developer for these

Item	Fill in
Test website address	
Admin email and password	
How to get the 6-digit booking code (see P-13)	
Are real email or SMS working on this website? (Yes / No)	
Who to send bugs to	

Prepare these

- **Images:** one small JPG or PNG to act as a QR code, one for a vehicle photo, and one for a payment screenshot.
- **Bad files:** a PDF, an image larger than 5 MB, and a text file renamed to **fake.png**.
- **Three browser sessions:** a normal window, a private (incognito) window, and a different browser. Use one per role, so sign-ins do not mix.
- **A real phone** if you can, as well as a computer.
- **Fake Nepali numbers** such as 9841234567 and 9851234567. A number must start with 97 or 98 and have 10 digits.

How to record a result

- Follow the steps in order. Sections 3 to 7 build on each other.
- Tick **Pass** only if everything in the "How to verify" column is true.
- Tick **Fail** if anything is different, and fill in a bug report (Section 11). Then continue with the next test where you can.
- All times shown on the website are Nepal time.

Standard test data. Use these values so your numbers match this guide. Replace **X** with today's date, such as 0712, so each test run has unique names.
Route: **Kathmandu X** to **Pokhara X**, 200 km, 7 hours, price 1200. Stop: **Mugling X**, 210 minutes after start, 110 km from start.
Fares this produces: Kathmandu to Mugling **Rs. 700** (set by hand), Mugling to Pokhara **Rs. 540** (worked out from distance), whole route **Rs. 1,200**.

2. How to verify properly

A message saying "saved" is not enough. A result counts as verified only when you see it in every place it should appear.

Check	What it means
On screen	The expected page, status or message appears, with no error or endless loading.
After a refresh	Press F5. The change is still there, so it was really saved.
In the other panels	After a booking changes, the passenger, the driver and the admin all see the same status, amount and seats.
In the numbers	Seats left, dashboard counts and revenue changed by the right amount.
In the audit log	Admin > Audit Log shows who did it, and when.

Booking statuses you will see

Status	Meaning	Are the seats taken?
HELD	Seats reserved, waiting for payment proof	Yes, until the time runs out
PAYMENT REVIEW	Proof uploaded, the driver must check it	Yes, during the review time
CONFIRMED	Driver approved. The ticket is available	Yes
REJECTED	Driver refused the proof	No, released
EXPIRED	Payment time ran out	No, released
CANCELLED	Cancelled by the driver or admin	No, released
PAYMENT RECONCILIATION REQUIRED	Proof arrived but the review time ended. It needs a person to sort out	No longer guaranteed

Seat colours

Green available, **blue** your selection, **yellow** held, **red** paid, **grey** blocked.

Default times

A passenger has **10 minutes** to pay, and the driver then has **15 minutes** to review. The admin can change both under Settings.

3. Admin panel tests

Open the website, scroll to the footer, and click **Admin sign in**.

ID	What to do	How to verify (it passes when…)	Result
A-01	Sign in with the correct email and password.	The Dashboard opens with figures and the buttons Today, 7 days and 30 days.	☐ Pass ☐ Fail
A-02	Sign out. Sign in again with a wrong password.	"Invalid credentials" appears. You stay on the sign-in page and the email you typed remains. The correct password still works afterwards.	☐ Pass ☐ Fail
A-03	Open each item in the left menu in turn: Dashboard, Drivers, Driver Changes, Vehicles, Seat Layouts, Locations, Routes, Fares, Trips, Bookings, Payments, Payment Accounts, Reports, Audit Log, Tickets, Website, Settings.	Every page opens with no error. The selected menu item is highlighted.	☐ Pass ☐ Fail
A-04	Drivers > **Add new**. Enter: name **Maya X**, a new email, a password of 12 or more characters, mobile, licence number, licence expiry in a future year, emergency contact. Leave address and photo empty. Click **Create**.	"Created" appears. The driver is in the list with status ACTIVE. Write down the email and password for Section 4.	☐ Pass ☐ Fail
A-05	Add another driver with the same email.	Refused with a message saying the email is in use. No duplicate appears in the list.	☐ Pass ☐ Fail
A-06	Add a driver with a password of only 8 characters.	Refused with a clear message. What you typed stays in the form.	☐ Pass ☐ Fail
A-07	Search for Maya X, click **Edit**, change the mobile number, then click **Save changes**.	"Changes saved" appears, even though address and photo are empty. After a refresh, the new number is shown.	☐ Pass ☐ Fail
A-08	Create a second, spare driver. Edit it and set Account status to **SUSPENDED**. Open Edit again.	The list shows SUSPENDED, and the form still shows SUSPENDED, not ACTIVE. Change the phone number and save: it must stay SUSPENDED.	☐ Pass ☐ Fail
A-09	Settings: click **Configure**. Change Customer hold to 12 and save. Refresh, then set it back to 10.	The list shows 12, then 10 again.	☐ Pass ☐ Fail
A-10	Locations: add a place named **Test place X**, then delete it.	It is added, then removed. Deleting a place used by a route (test this after Section 4) is refused.	☐ Pass ☐ Fail
A-11	Website: change a piece of text, such as the footer description, and save. Open the home page in the private window. Then change it back.	The new text appears for visitors. No error appears.	☐ Pass ☐ Fail
A-12	Audit Log: look at the top rows. Search for **create drivers**.	Your actions appear with your name, the time, and a View link. Previous and Next work when there are many rows.	☐ Pass ☐ Fail

4. Driver panel: setup

Use a second browser session. Footer > **Driver sign in**, and use the Maya X details from A-04.

ID	What to do	How to verify (it passes when…)	Result
D-01	Sign in as the driver. Open Profile, Vehicles, Routes, Payment, Publish Route, Trips, Bookings, Passengers and History.	Every page opens. No admin menu is shown.	☐ Pass ☐ Fail

ID	What to do	How to verify (it passes when…)	Result
D-02	Profile: add an address and photo, then click **Save my details**.	"Your profile was saved" appears. It stays after a refresh.	☐ Pass ☐ Fail
D-03	Profile: change password with a wrong current password.	Refused: "Your current password is not correct."	☐ Pass ☐ Fail
D-04	Profile: change password correctly, sign out, and sign in with the new one.	The new password works and the old one does not.	☐ Pass ☐ Fail
D-05	Vehicles > **Add vehicle**. Name **Maya Van X**, number **BA X**, type Hiace, emergency contact, amenities "AC, Wi-Fi", one photo, Seat plan **Hiace (17 seats)**. Click **Add vehicle**.	The vehicle card shows "17 seats" and an ACTIVE badge.	☐ Pass ☐ Fail
D-06	Add another vehicle with the same number.	Refused with a message saying that number is already used.	☐ Pass ☐ Fail
D-07	Try to add a vehicle without choosing a seat plan.	Refused: "Choose a seat plan for this vehicle."	☐ Pass ☐ Fail
D-08	Click **Change details** on the van, change its description, and save.	The change is saved. The seat plan cannot be changed, and the form explains why.	☐ Pass ☐ Fail
D-09	Routes > **Add route** using the standard test data. Click **Add stop** for Mugling. Under "Prices between stops", set Kathmandu to Mugling = 700. Click **Add route**.	A card shows the route, Rs. 1,200, 200 km, 7 hours and "Via Mugling X".	☐ Pass ☐ Fail
D-10	Add a route where the start and end are the same place.	Refused: "The start and end must be different places."	☐ Pass ☐ Fail
D-11	Add a route with a stop 500 minutes after the start (later than the whole 7-hour trip).	Refused with a message about the order of stops. No new route appears.	☐ Pass ☐ Fail
D-12	Payment > **Add account**. Enter eSewa, the account holder, instructions, and a QR image. Tick "Use as my default QR". Click **Add account**.	A card shows eSewa and the QR image.	☐ Pass ☐ Fail
D-13	On the Payment page, upload the **PDF**, the **image over 5 MB**, and **fake.png** as the QR.	Each file is refused with a clear message. No broken image appears.	☐ Pass ☐ Fail
D-14	Delete the van, the route or the eSewa account **after** trips exist (try this at the end of Section 5).	Refused with a message that it is still used. The error shows on the page and the record stays.	☐ Pass ☐ Fail

5. Driver panel: publishing trips

ID	What to do	How to verify (it passes when…)	Result
D-20	Publish Route > **Single trip**. Choose vehicle, route and payment account. Set Departure 1 to tomorrow at 06:00. Click **Publish selected departures**.	"The departure is published and open for booking" appears. Under Upcoming trips, the trip shows the right date, starts 06:00, ends 13:00, and Rs. 1,200.	☐ Pass ☐ Fail
D-21	Publish the same vehicle again tomorrow at 08:00.	Refused: "This vehicle or driver already has an overlapping trip." No new trip appears.	☐ Pass ☐ Fail
D-22	Use **Add departure**: one at a free time, and one that overlaps D-20. Publish.	Refused, and **neither** departure is created. Check Upcoming trips: nothing new. (All or nothing.)	☐ Pass ☐ Fail
D-23	Publish a departure with a date in the past.	Refused: "Schedule a future departure."	☐ Pass ☐ Fail
D-24	Choose **Double trip**. Start date = 3 days from today. End date = 5 days from today. Schedule 1 at 06:00, schedule 2 at 16:00, with the same route, vehicle and account in both.	The page shows "Preview: 6 separate trips".	☐ Pass ☐ Fail
D-25	Click **Publish schedule**.	"6 trips published across 3 days" appears. Six trips are listed, in date order, with no duplicates and correct times. Two schedules appear under Published schedules.	☐ Pass ☐ Fail
D-26	Click **Publish schedule** again with the same dates.	Refused with the overlap message. The trip count stays at 6 plus the D-20 trip.	☐ Pass ☐ Fail
D-27	Click the **7 days**, **14 days** and **30 days** buttons. Do not publish. Then enter custom dates.	Start and end dates change correctly, and the preview number equals days x schedules.	☐ Pass ☐ Fail
D-28	Publish 14 days, then repeat with 30 days, using a different vehicle or later dates that do not overlap.	The right number of trips is created. Look for gaps or repeated dates. Note if it takes unusually long.	☐ Pass ☐ Fail
D-29	On one published schedule, click **Pause**.	Status shows PAUSED. In the passenger window, those trips are no longer found by search. Click **Resume**: they are found again.	☐ Pass ☐ Fail
D-30	On the Bookings page, open **Trip controls** and click **Close booking** on one trip of a published schedule. Back on Publish Route, click **Pause** on that schedule, then **Resume**.	All its trips reopen **except** the one you closed by hand, which stays closed. Check on the Bookings page, and in passenger search.	☐ Pass ☐ Fail
D-31	Click **Extend** on a schedule and choose a date two days after its end.	Exactly two new trips appear. Existing trips do not change.	☐ Pass ☐ Fail
D-32	Click **Cancel future** on a schedule that has no bookings.	The status shows CANCELLED and its trips disappear from Upcoming trips and passenger search. Extend is now disabled.	☐ Pass ☐ Fail
D-33	On a trip with no bookings, open **Edit schedule and booking window**. Move departure 2 hours later and save.	The arrival also moves 2 hours later. Other trips stay the same.	☐ Pass ☐ Fail
D-34	In the same form, set Booking closes to a time after departure.	Refused with a clear message.	☐ Pass ☐ Fail

ID	What to do	How to verify (it passes when…)	Result
D-35	On a trip with no bookings, click **Cancel trip** and enter a reason.	"The trip was cancelled" appears, and it leaves Upcoming trips.	☐ Pass ☐ Fail

6. Passenger tests

Use the private window, without signing in. Use the trips published in Section 5, on a date with a free trip.

ID	What to do	How to verify (it passes when…)	Result
P-01	Home page: enter From **Kathmandu X**, To **Pokhara X**, and the travel date. Click **Find a ride**.	Trips for that date are listed with times, Rs. 1,200 and seats left.	☐ Pass ☐ Fail
P-02	Search From **Mugling X** To **Pokhara X** on the same date.	The card shows Mugling X to Pokhara X and **Rs. 540**, with the Mugling time, and "Part of Kathmandu X to Pokhara X".	☐ Pass ☐ Fail
P-03	Search in the wrong direction: From **Pokhara X** To **Kathmandu X**.	"Not available currently" appears. The trip is not listed.	☐ Pass ☐ Fail
P-04	Search for a date with no trips.	A friendly empty message appears, with buttons to clear the search or track a booking.	☐ Pass ☐ Fail
P-05	From P-02, click **Choose seats**.	"Your journey" shows Mugling X and Pokhara X selected, and the fare is still **Rs. 540**.	☐ Pass ☐ Fail
P-06	Change Boarding stop to Kathmandu, and Drop-off stop to Mugling.	Fare changes to **Rs. 700**, and Boards at and Reaches times update. With Kathmandu to Pokhara, it is Rs. 1,200.	☐ Pass ☐ Fail
P-07	Select 2 seats. Then try to select 9 seats.	The total doubles the fare. You cannot select more than 8.	☐ Pass ☐ Fail
P-08	Go back to Mugling to Pokhara. Choose a seat and click **Continue**. Enter the phone number **1234**.	The form will not submit, and it asks for a valid mobile number.	☐ Pass ☐ Fail
P-09	Enter a name and **9841234567**, then click **Hold seats & view payment QR**.	A booking page opens with a reference (SY-...), a countdown, the QR, Rs. 540, and the journey Mugling to Pokhara. Write down the reference.	☐ Pass ☐ Fail
P-10	Open the same trip in another browser on the same journey.	That seat is **yellow** and cannot be clicked. In the driver's Bookings page it shows as HELD.	☐ Pass ☐ Fail
P-11	Back on the booking page, try to upload the **PDF** and **fake.png** as proof.	Refused with a clear message. The booking stays HELD.	☐ Pass ☐ Fail
P-12	Upload the payment screenshot, enter the bank or wallet name, and click **Submit for verification**.	The status page opens showing PAYMENT REVIEW and a review countdown. Driver and admin can now see the proof.	☐ Pass ☐ Fail
P-13	Use the normal window (a "new device"). Click Track booking. Enter the reference and phone. Click **Send verification code**. Get the code as agreed with the developer, then click **Verify & view booking**.	The booking opens. A wrong code shows "Invalid or expired code". A wrong phone number must not reveal whether the booking exists.	☐ Pass ☐ Fail
P-14	Open the booking link in a different browser without verifying.	The booking is **not** shown. It asks you to verify your phone.	☐ Pass ☐ Fail

7. Driver panel: running the trip

ID	What to do	How to verify (it passes when…)	Result
D-40	Open Bookings. Find the booking from P-12. Click **View payment proof**.	The passenger's name, phone, seat and Mugling to Pokhara journey are correct. The screenshot opens.	☐ Pass ☐ Fail
D-41	Click **Approve payment**. Enter an amount lower than the fare and try to continue.	It will not continue. The amount must cover the full fare.	☐ Pass ☐ Fail
D-42	Enter 540, a wallet reference and a note. Tick the confirmation box. Click **Approve and confirm seats**.	"Payment verified and seats confirmed" appears and the booking shows CONFIRMED.	☐ Pass ☐ Fail
D-43	Passenger: refresh the booking page. Click **Download ticket**, then **Print / save PDF**.	"You're ready to travel" appears. The ticket shows the reference, seat, Mugling to Pokhara, the boarding time, Rs. 540 and the driver's contact.	☐ Pass ☐ Fail
D-44	Passenger: open the trip again. Check the sold seat for Mugling to Pokhara, then for Kathmandu to Mugling.	It is **red** for Mugling to Pokhara, and **green** for Kathmandu to Mugling, because that part of the route is still free.	☐ Pass ☐ Fail
D-45	Book the free part (Kathmandu to Mugling) on that same seat, as a new passenger.	The booking works. A seat can be sold once per part of the route, and never twice on the same part.	☐ Pass ☐ Fail
D-46	New passenger: book a seat with the number 9851234567 and upload proof. Driver: click **Reject & release seats** and enter a reason.	Passenger sees REJECTED and your reason. The seat is green again. There is no way to approve it later, for the driver or the admin.	☐ Pass ☐ Fail
D-47	New passenger: upload proof. Driver: click **Ask clarification** with a question.	Passenger sees your message on the booking page and can reply. The driver can still approve or reject.	☐ Pass ☐ Fail
D-48	Two passengers use the **same transaction reference** in their proof. Driver: approve one.	A warning about the duplicate reference appears. Approval needs an extra tick box.	☐ Pass ☐ Fail
D-49	Choose a trip in the Trip filter. Under Live seat availability, click **Add offline booking**. Enter a name, phone 9841111111, stops, a seat. Tick Payment received offline and leave the amount blank.	The booking is created as CONFIRMED at the full fare. The seat is taken for online passengers, and booking tracking finds it with 9841111111.	☐ Pass ☐ Fail
D-50	Open **Block or unblock seats on this departure**. Block a free seat with a reason. Try a reserved seat.	The free seat shows blocked, and it is grey for passengers on that trip only. A reserved seat cannot be clicked.	☐ Pass ☐ Fail
D-51	On a held or confirmed booking, click **Cancel booking** and give a reason.	The seat is free again and the passenger sees CANCELLED. If it was paid, the booking shows a refund for the admin to settle.	☐ Pass ☐ Fail
D-52	Try to cancel a trip or reschedule a trip that has an active booking.	Refused with a message explaining why. Booking and trip stay unchanged.	☐ Pass ☐ Fail
D-53	Open **Trip controls**. Click **Close booking**, and check as a passenger. Then click **Open booking**.	When closed, search does not show the trip. The trip page says booking is closed. It works again once reopened.	☐ Pass ☐ Fail
D-54	Open Passengers and choose the trip. Search for the passenger. Click **Check in**, then **Boarded**.	Only confirmed passengers are listed, and their status updates.	☐ Pass ☐ Fail

ID	What to do	How to verify (it passes when…)	Result
D-55	In Passengers, open **Check a passenger's ticket**. Paste the code from "Secure ticket verification code" on the passenger's booking page. Then paste changed or random text.	A real code shows "Valid paid ticket". Changed text is refused.	☐ Pass ☐ Fail
D-56	In Trip controls, click **Start boarding**, **Depart**, then **Complete trip**.	Status moves through BOARDING, DEPARTED and COMPLETED. Booking cannot be reopened. The trip appears in History.	☐ Pass ☐ Fail

8. Complete journey across all three panels

This is the most important test. Run it from start to finish with fresh data and keep all three sessions open side by side. If you are short of time, run Section 3 and this section.

ID	What to do	How to verify (it passes when…)	Result
X-1	**Admin** creates a new driver.	The driver appears in the list. Audit Log shows it.	☐ Pass ☐ Fail
X-2	**Driver** signs in and creates a vehicle, a route with a stop and leg price, and a payment QR.	All three show as active.	☐ Pass ☐ Fail
X-3	**Driver** publishes morning and afternoon trips for 3 days.	Six trips appear, in date order.	☐ Pass ☐ Fail
X-4	**Passenger** searches Mugling to Pokhara, and picks a seat.	Fare is the same on search, the seat page and the payment page (Rs. 540).	☐ Pass ☐ Fail
X-5	**Passenger** holds the seat, pays and uploads proof.	Passenger: PAYMENT REVIEW. Driver: booking appears with the proof. Admin: Payments, filter **Waiting for review**, shows it.	☐ Pass ☐ Fail
X-6	**Driver** approves it.	Driver: CONFIRMED.	☐ Pass ☐ Fail
X-7	**Passenger** refreshes.	CONFIRMED, ticket available.	☐ Pass ☐ Fail
X-8	**Admin** checks Bookings (search the reference), Payments (filter Verified), and Dashboard.	Same reference, amount, seat and status everywhere. Confirmed bookings rises by 1. Verified revenue rises by Rs. 540.	☐ Pass ☐ Fail
X-9	**Admin** opens Audit Log and searches **PAYMENT_VERIFY**.	The row names the driver. Also find "proof submitted" with the actor Passenger.	☐ Pass ☐ Fail

Then repeat these three paths

ID	What to do	How to verify (it passes when…)	Result
X-10	**Rejection:** repeat X-4 and X-5, then the driver rejects.	All panels show REJECTED, seat free, and verified revenue does not change.	☐ Pass ☐ Fail
X-11	**Cancellation and refund:** take a confirmed booking. Admin: Bookings > Open > **Cancel booking**. Then Approve refund, then Mark refund sent with a reference.	Seat becomes free. Refund moves to pending, approved, then completed. Open refunds goes up, then back down. Refunds paid on the Dashboard rises.	☐ Pass ☐ Fail
X-12	**Expiry:** Admin sets Customer hold to 1 minute. Passenger holds a seat and does not pay. Wait 2 minutes and refresh. **Set it back to 10 afterwards.**	Passenger sees EXPIRED. Seat is green again, and proof upload is no longer offered.	☐ Pass ☐ Fail

9. Admin monitoring tests

Do these after Sections 4 to 8, when there is data to look at.

ID	What to do	How to verify (it passes when…)	Result
A-20	Dashboard: switch between Today, 7 days and 30 days. Click **Export CSV**.	Figures change sensibly. The file opens, and its numbers match the screen.	☐ Pass ☐ Fail
A-21	Trips: search by vehicle, and filter by status. Click **Manifest** on a trip with confirmed passengers.	Filters work. The file lists only confirmed passengers, with seats and journeys. Nepali names display correctly.	☐ Pass ☐ Fail
A-22	Bookings: search by reference, by name and by phone. Filter by each status. Use Next and Previous.	Only matching bookings are shown, and Clear restores the list.	☐ Pass ☐ Fail
A-23	Bookings: click **Open**, and read the booking history. Click **Print ticket** on a confirmed booking.	The history is complete and in time order. The ticket shows correct details.	☐ Pass ☐ Fail
A-24	Bookings: **Walk-in booking**. Check the trip list. Create one with Awaiting payment, and one with Cash received.	The soonest trips appear first. The cash booking is CONFIRMED. Cash without the evidence and confirmation is refused.	☐ Pass ☐ Fail
A-25	Payments: filter by Waiting for review, Verified and Rejected. Search by reference.	The list matches the filter. Verified and rejected payments have **no** Verify or Reject buttons.	☐ Pass ☐ Fail
A-26	Trips: click **Cancel trip** on a trip with bookings and enter a reason.	All its bookings become CANCELLED. Paid ones become refunds. The trip leaves passenger search.	☐ Pass ☐ Fail
A-27	Edit a trip made by a driver with a booking window, change the boarding point, and save.	The boarding point changes. The driver's booking window stays the same.	☐ Pass ☐ Fail
A-28	Trips: Edit a trip and click a free seat in Trip seat inventory. Enter a reason.	The seat is blocked for passengers. Reserved seats cannot be clicked.	☐ Pass ☐ Fail
A-29	Driver Changes: find an item from Maya X and click deactivate on a vehicle, then activate it.	While deactivated, that vehicle's trips disappear from passenger search. They return when activated.	☐ Pass ☐ Fail
A-30	Tickets: paste a valid ticket code, then a cancelled booking's code.	Valid is accepted. The cancelled one is refused.	☐ Pass ☐ Fail

ID	What to do	How to verify (it passes when…)	Result
A-31	Drivers: set a driver to DEACTIVATED while that driver is signed in on another browser. Have the driver click any link.	The driver is signed out and cannot sign in. Their trips stop taking bookings. Trips do not reopen by themselves if the driver is reactivated (this is expected).	☐ Pass ☐ Fail

10. Security and wrong-use tests

ID	What to do	How to verify (it passes when…)	Result
S-01	Without signing in, open **/admin/dashboard** and **/driver/bookings**.	You are sent to the sign-in page.	☐ Pass ☐ Fail
S-02	Without signing in, open **/api/admin/reports**.	Access is refused and no data is shown.	☐ Pass ☐ Fail
S-03	Signed in as a driver, open **/api/admin/reports**. Signed in as admin, open **/api/driver/bookings**.	"Access denied" in both cases.	☐ Pass ☐ Fail
S-04	Create a second driver with their own trips. Sign in as driver 1. Open a booking or trip link belonging to driver 2.	Not found. Driver 1 sees none of driver 2's vehicles, routes, bookings or passengers.	☐ Pass ☐ Fail
S-05	Passenger: copy the link of a payment proof image from the driver page. Open it in a browser that is not signed in.	The image does **not** open.	☐ Pass ☐ Fail
S-06	**Double booking:** two browsers select the same free seat. Click the hold button in both as close together as possible.	Exactly one succeeds. The other sees "A selected seat is unavailable". The seat is never sold twice.	☐ Pass ☐ Fail
S-07	Double-click the hold button quickly.	Only one booking is created. The driver's list has no duplicate.	☐ Pass ☐ Fail
S-08	Open a past or cancelled trip's link, as a passenger.	Booking is closed. Seats cannot be selected.	☐ Pass ☐ Fail
S-09	Type **<script>alert(1)</script>** as a passenger name, and in a driver's vehicle description.	It appears as plain text, or is refused. No pop-up ever appears, in any panel.	☐ Pass ☐ Fail
S-10	Enter very long text, negative numbers, and a 0 fare in forms.	Clear messages appear. No crash and no blank page.	☐ Pass ☐ Fail
S-11	After signing out, press the browser's Back button and try to use the page.	Actions are refused and you are returned to sign-in.	☐ Pass ☐ Fail
S-12	Turn off the internet and click a button. Turn it back on.	A clear connection message appears. Things work again afterwards.	☐ Pass ☐ Fail
S-13	Check the Network tab if you know how: search a trip and view the response.	No maintenance notes, emergency contacts or password data appear in public responses.	☐ Pass ☐ Fail

Screen and device checks

Check these pages on each size: home, search, seat page, payment page, driver Publish Route, driver Bookings, admin Dashboard, admin Bookings.

Size	Device	Done	What to check
320 px	Small phone	☐	**No sideways scrolling.** Buttons are large enough to tap.
390 to 430 px	Normal phone	☐	Menus work. The sticky Continue bar never hides a field.
768 px	Tablet	☐	Layout looks tidy. **Not yet tested by the developer.**
1440 px	Desktop	☐	Tables are readable. Pop-ups are centred.

Tip: in Chrome, press F12, then the phone icon, to try each width. Finish with a real phone if you can. Also try **keyboard only**: use Tab, Enter and Space to book a seat. Keyboard use has not been tested yet, so anything you find here is valuable.

11. Reporting and sign-off

Not bugs: expected behaviour

- Passengers cannot cancel a booking themselves. They contact the driver.
- A trip does not complete by itself. The driver marks it.
- A reactivated driver's trips stay closed until reopened one by one.
- A driver cannot cancel a trip that still has bookings. The bookings must be cancelled first, or the admin cancels the trip.
- Wrong passwords never lock an account.
- Passengers book without an account. One contact is used for all seats in a booking.
- A vehicle's seat plan cannot change after it is created.

Bug report: copy this for each problem

Test ID	
Title (one line)	
Role and account used	
Website address and page	
Browser and device	
Steps to repeat it	1. 2. 3.
Expected result	
What actually happened	
Booking reference (if any)	
Screenshot attached?	
Severity	☐ Critical ☐ High ☐ Medium ☐ Low

How serious is it?

Severity	Meaning	Example
Critical	Money, seats or private data are wrong	Seat sold twice, wrong fare charged, another person's booking is visible
High	A main task cannot be done	Driver cannot approve a payment
Medium	It works, but wrongly or with difficulty	Wrong count on the dashboard
Low	Cosmetic	Spelling or spacing

Sign-off
